DETAILED ACTION

This office action is in response to the amendment filed on August 26, 2002.

Response to Arguments

1. Claims 1 and 2 as amended, and their dependent claims 3-9 have been considered. The rejection of claims 1-3 follows.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by McElroy et al. US # 5,835,868.

McElroy et al. discloses an automated system for immobilizing a vehicle. Wherein, in Fig. 8 and column 21, lines 1-64 teach:

- Terminal connections M1 and M2 to an actuator;
- A control circuit 300 comprising three grounded relays 308, 316 and 320, (having two voltage supply lines). Wherein relay 308 is a power relay having an output to a direction control relays 316 and relay 320;
- A one line 5Volts direction control signal "Cd";
- Upon the presence of the direction control signal "Cd" (a control line) and adequate power voltage at either or both of the direction control relay 316 or 320 respectively, the appropriate relay coil 322 and/or 324 energizes causing the

appropriate terminal 326 and/or 328 to close. This action determines which motor terminal M1 or M2 is energized and consequently controls the voltage polarity and the direction of rotation of the motor 204. The "Truth Table" also shown in Fig.8 is used to determine the direction of rotation of the motor 204 based upon the wiring of the motor control circuit 300 and upon which control signals are present.

Allowable Subject Matter

4. Claims 4-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is an examiner's statement of reasons for allowance:

Prior art listed in the attached PTO-892 form considered to be pertinent to the submitted application.

However, the cited prior art does not teach or suggest in combination:

- An electronic unit connected to its voltage supply to at least two voltage inputs of the actuator unit via a rectifier bridge;
- First and second polarity control inputs which actuate a first change-over switch connecting an associated polarity control input, a first of at least two voltage output to ground via a measuring resistor, and a second change-over switch connecting the associated polarity control input, the second of at least two voltage outputs to ground and to the voltage input in the state in which a signal is supplied;

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
